

BALL BURNISHING MACHINE

POLISTAR[★]Silver

MODEL

The POLISTAR SILVER is the latest generation of the Moreillon Goliath models (Goliath II and Goliath 2000)

AREA OF APPLICATION

The ball burnishing machine is suitable for the care of all metals such as:

- ✓ Solid silver ✓ silver-plated and gold-plated objects
- ✓ copper ✓ brass ✓ bronze ✓ aluminum
- ✓ stainless steel ✓ chrome-plated surfaces

EXPERIENCE

The POLISTAR SILVER is the product of over 60 years of experience in the construction of ball burnishing machines.

TECHNOLOGY

The latest technical achievements in terms of material selection and mechanics.

HOW IT WORKS

The polishing balls are rolled on an endless and continuously moving conveyor belt in a semi-circular, open trough without disturbing vibrations.

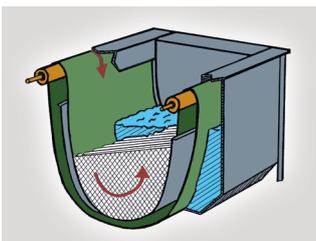

OPERATION

The polishing material can be loaded and unloaded while the machine is running.

TECHNICAL DATA

Type	POLISTAR SILVER
Size polishing trough	DM 310 x 430 mm
Dimensions	B 560 x T 675 x H 900 mm
Belt speed	constant 40 cm/second
Weight	81 kg (without polishing balls)
Power input	300 W
Operating voltage	230 V/50 Hz
Certification	CE
